Industrial Drain Cleaner

Information Sheet

Green Bull™ **Industrial Drain Cleaner** naturally breaks down fats, oils & grease in the drain lines & grease traps of restaurants and food processing facilities. It is extremely effective and non-toxic and non-caustic so it will not harm drain lines. It benefits the environment.

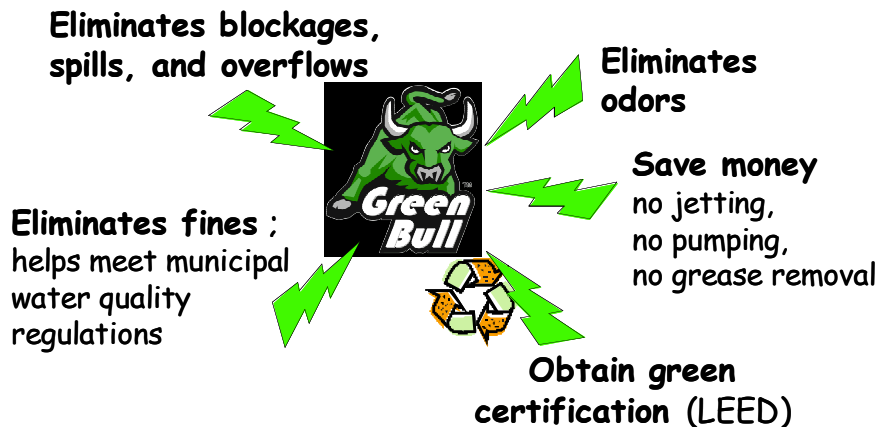

Green Bull's product is based on a bacterial formula that colonizes in the pipes and grease traps and literally eats the grease – leaving behind only water and carbon dioxide.

Peace of Mind: Green Bull helps provide a great customer experience! It eliminates worries about restaurant odors or the possibility of untimely trap and drain related backups.

Green Bull's solution simplifies your grease management task because it is automatically fed into your grease trap each evening through a computerized metering unit. Doses are customized to your operation. (type of cuisine, meals served, etc.).

Green Bull helps provide a great customer experience! It eliminates worries about grease and drain pipe related odors or back-ups.

- **Powerful:** strongest product on the market
- **Safe:** All natural formula is non-toxic and environmentally beneficial
- **Lower Cost:** Reduces grease trap pumping by 60-70%, eliminates jetting, and reduces restaurant grease management costs by 50%
- **Regulatory Compliant:** Prevents FOG (Fat, Oil & Grease) from entering municipal waste stream
- **Green Tech:** Creates a biological barrier of billions of bacterial colonies on the inner surface of pipes to prevent grease buildup

A Green Solution that Works!
